STATEMENT OF OPERATING PROCEDURES FOR Navicomm LLC

Navicomm LLC is a provider of operator services and traditional long distance. In providing operator and long distance services, Navicomm LLC, does not have nor does it maintain any CPNI. However, if the situation would arise, Navicomm LLC requires all the data to be stored in databases that require security clearance and security passwords to protect the information. The data will be stored in a secure room with card access to only those individuals who have been approved to have access and have a need to know. Further, all requests for CPNI data would require approval from the President.

Navicomm LLC does not market to the general public but to agents. As such, Navicomm LLC is not in a position to have consumer's name and address. In fact, the end users that Navicomm LLC provides operator services to are considered the customers of the local exchange carrier. Thus, Navicomm LLC does not have access to any CPNI that is useable to it or commercially marketable anyone else. If Navicomm LLC was to obtain this information, it would not sell or market this information. Further, Navicomm LLC has no affiliates.

In general, Navicomm LLC protects all its data with security passwords and all data is physically stored in locked offices. Further, the President must approve any request for customer data.

Respectfully submitted,
